

The 13th International Symposium on Microbial Ecology (ISME13) will take place in Seattle, USA on August 22-27, 2010

MARCH 26, 2010: Abstract submission deadline.

Building on the success of ISME12, the 13th International Society for Microbial Ecology Conference will be in Seattle, WA, USA from August 22 - 27, 2010. As is ISME tradition, we have a vibrant scientific program planned with plenary presenters; Rita Colwell, J. William Costerton, Penny Chisholm, Jeffrey Gordon, Ove Hoegh-Guldberg, Bo Barker Jorgensen, Ian Sanders, Christa Schleper, and Warwick Vincent.

The venue, Washington State Convention & Trade Center, is at the center of downtown Seattle, a city that inspires innovation. Seattle combines the best of the outdoors, surrounded by dramatically beautiful mountains and forests, with the best of city life. Known to many as the "Emerald City", Seattle is renowned for being "green" and you notice the eco-friendly policies of the city at every corner.

We invite you as an integral part of this stimulating symposium and we are looking forward to welcoming you to Seattle.
